Activity

Schneider Electric is the global specialist in energy management and automation. With revenues of € 26.6 billion in FY 2015, our 160,000 employees serve customers in over 100 countries, helping them to manage their energy and process in ways that are safe, reliable, efficient and sustainable. From the simple stuff switch to complex operational systems, our technology, software and service improve the way our customers manage and automate their operations. Our connected technologies reshape industries, transform cities and enrich lives. At Schneider Electric, we call this Life Is On.

Solutions at a glance

Homes From grid to living space, we ensure peace of mind, comfort, and sustainability. We keep people safe, secure, and in control of their environment and energy through intuitive, adaptive technologies for energy-efficient homes.

Buildings

From grid to floor space, we ensure safety, comfort, reliability, efficiency, and sustainability. Our solutions include world-class building and energy management systems, security controls, energy and carbon dashboards, and building analytics.

Cities

From downtown to suburb, we deliver urban efficiency today. To us, a smart city is an urban center where infrastructure management and energy efficiency go hand in hand.

Electrical utilities & renewables

From source to load, we make the grid easy, efficient, and reliable. Together with our partners, we enable smarter utilities, the integration of distributed renewable energies, and increased energy efficiency through smart metering and devices.

Industry

From process automation to machines, we make industry smart, safe, efficient, and productive. No matter the approach to production or industrial segment, we see the promise of a bright industrial future.

Data centers

From rack to cyberspace, we optimize performance, speed, and cost. We build highly available and energy-efficient data centers that service the growing IT needs of all types of companies.

Remote Communities

From off-grid to fuel-poor communities, we create innovative solutions to address the energy paradox. We balance our planet's carbon footprint while upholding the indisputable human right of everyone to energy access.

Nature of Business

The global specialist in energy management and automation
