### Background

Energypac Electronics Limited was established in 2005, a concern of the Energypac family, aiming to provide complete electronic solution. It holds one of the most modern and pioneering electronics industry in Bangladesh. It includes sophisticated manufacturing equipments along with the research and development facilities to ensure the quality of the products in every stage of manufacturing. We are also representing world's most renowned French brand "LEGRAND" for its low voltage electrical solution.

The organization has devoted in research, development and production of highly efficient, environment-friendly products for the customers. These products not only meet internationally certified standards but also save energy in order to benefit the world. For the past years, Energypac continuously presented energy-efficient products to our clients. We believe, these continuous efforts would not only benefit Energypac but also increase the living standard worldwide, helping us to "Go Green".

### Nature of Business

Energypac Electronics has been successfully manufacturing low voltage electrical products such as; Electrical Wiring accessories, Lighting & Luminaries, Fixtures and Ceiling Fan.

Besides manufacturing, project solution (Measuring energy efficiency and providing solution) along with Green Solution (Renewable Energy) has also been a part of Energypac Electronics' operation.
