### Background

Paragon achieved a tremendous growth in vertically integrated poultry businesses. It started with commercial layer farming in 1993 with initial invested of BDT 3 Million. Now after 23 years its annual turnover stands at approximately BDT. 800 crores. Two commercial broiler farms, two commercial layer farms, four tea estates, one PP bag manufacturing plant, one printing and one solar energy plant, one process & further process unit.

This phenomenal growth achieved through updated with modern and new concepts, innovativeness and integrations. Paragon is the first mover of introducing poultry rearing in environmental control house for the first time within the Indian Subcontinent. During that time general practices were rearing maximum 2000 birds in open house. But Paragon installed 50,000 capacity control sheds at a time, which was proven as a milestone for the development of our poultry industry. Paragon is one of the pioneers in establishing Grand Parent Poultry Farm, by which dependency on import operations reduced substantially. Especially the country successfully becomes self-sufficient in producing Parent Chicks. Paragon hugely contributed to the national economy by cutting down the foreign expenses for importing Day Old Parent Chicks.

### Nature of Business

Producing day old Broiler & layer parent, day old commercial layer chicks, manufacturing poultry, fish & shrimp feed from 8 different feed mill in different districts of Bangladesh, printing & packaging, making tea, WPP Woven Bags, FIBC, Solar Panels & minigrad project & Consumer Foods etc.
