### Background

ElectroMech Automation & Engineering Ltd. is an engineering company specialist in automation, protection & controls and distribution.

ElectroMech started its journey in 2007 with a group of professionals who have been experienced with engineering solutions at factory level and thus decided to be the solution provider of factory for electrical systems.

Mitsubishi, the world giant for electrical equipment & system manufacturer added the pace at this journey confirming its global partnership for Bangladesh Territory. Now, ElectroMech is the prestigious distributor of Mitsubishi Electric Co. Japan, FRAKO Germany & Sole Distributor of INDELEC, France.

Our products ranges from 11kV to machine connections including, 11/0.415kV ONAN Distribution Transformer, HT Switchgear, LT Switchgear, PFI Plant, Motor Control Centre, Distribution Board and Busway System from 25A to 6300A.

In addition of complete system capability, we have also adequate quantities of spare parts for repairing & renovation activities of the systems/equipment. Ready Stock of ACB, MCCB, MCB, Magnetic Contacts, OLR, VFD, PLC and FRAKO Capacitors & PF Controller. Strong & dedicated after sales team for 24/7 response.

ElectroMech believes in indigenous potentiality of human resources. It has formed a balanced team in combination with numbers of university graduates in engineering, business and accounting. Board of Directors, Managing Director & top level managers are the key to planning, executing & controlling the company's long terms & short terms objectives.
