Background

Incepta began its operation with a handful of highly skilled and dedicated professionals guided by a dynamic leadership. Proper strategic planning, technical excellence, swift and timely decisions helped us to achieve our objectives. Incepta was able to anticipate the need of the market and provide the right product at the right time. High focus on Research and Development (R & D) investment from the very beginning made possible the introduction of quality products ahead of its competitors in most cases.

Established in the year 1999, Incepta Pharmaceuticals Ltd. is now the second largest company of the country and recognized as the fastest growing of the top five manufacturing company in the country with vision to become a trusted healthcare company to ensure better health for everyone, everywhere.

Incepta Pharmaceuticals Ltd. currently exports drugs to more than fifty countries including UK and Turkey and is actively looking to expand its market presence in Europe.
